**SOLUTION**

## ABOUT US

---

Smart Storage Technologies provide solutions for your Storage requirement through its expertise in Concept Design, Manufacturing, marketing, installation, commissioning & Service.

Vast experience in Small, Medium & Large scale of quality storage System development in all type industries. Space makers, Value addition in increasing the storage capacity in the proposed area. Smart Storage Technologies has been recognized to be an excellent service provider with more than a decade of experience.

## INDUSTRIES WE SERVE

---

- Automobile
- Food & Beverages
- Logistic & Warehouse
- Pharmaceutical
- Mechanical & Electrical Industries
- E – Commerce
- Clothing & Garments
- Electronics
- Aerospace
- Construction Industries

## HEAVY DUTY RACKING

### *General Characteristics of Shelving Racks:*

Multipurpose use for manual storage of various goods. Wide variety of heights and loads. Shelving of different design, including shelves for storing heavy goods. Shelving systems provide easy access to any product at any time; universality of allowable loads - from small to large-sized.

Adjustment options of single shelves - it doesn't need to affect other tiers. Smart Shelving rack always offer you safety, ergonomics and aesthetics.

## PALLET RACKING SYSTEM

---

The most universal system for direct and single access to each pallet. The optimal solutions for those warehouses with palletized products. The working aisle measurement between each rack and the rack height depends upon the characteristics of the forklift trucks or lifting devices, pallet size and the height of the warehouse itself.

### *Advantages*

- Total stock control: each storage space is taken up by a single pallet.
- Maximum adaptability to any load type both in terms of weight and volume.
- It can be combined with long span beams for manual selection of goods.

## CANTILEVER RACKING SYSTEM

---

Cantilever Rack is a perfect storage solution that allows storage of longer, thinner, oversized, long loads & other items like beams, Pipes lengthy wood, and more.

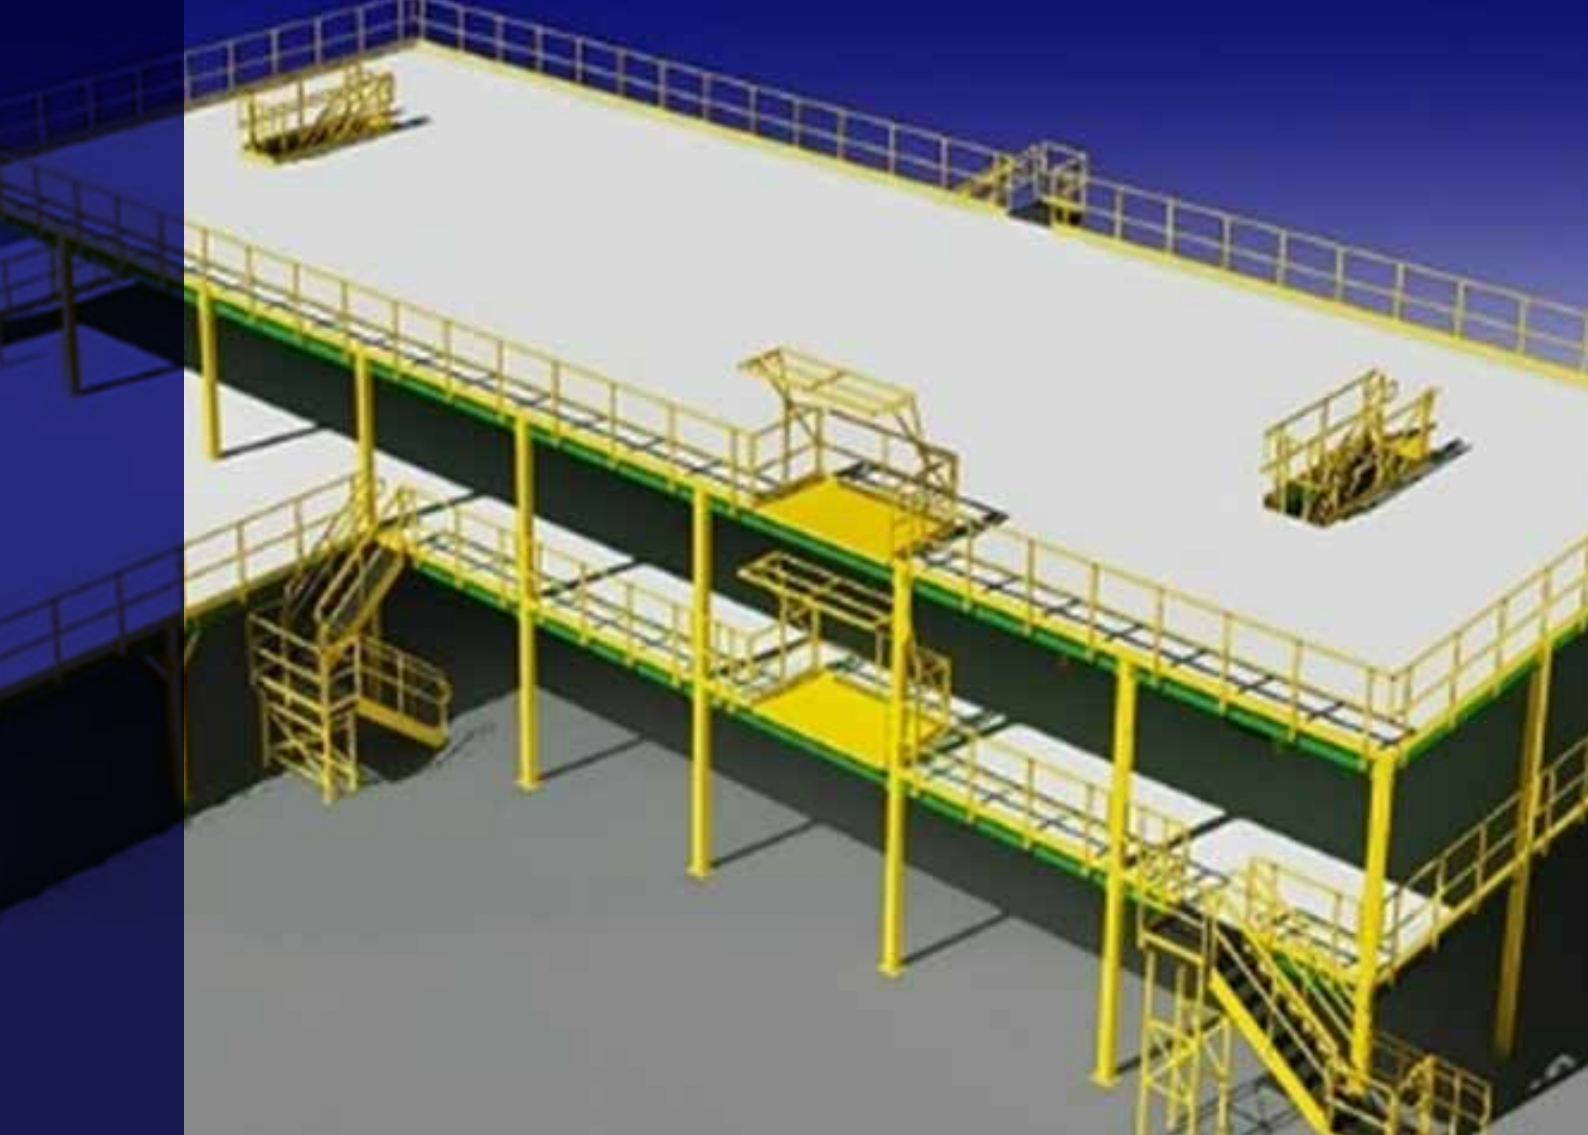

## MULTI-TIER RACKING SYSTEMS

- Maximum Utilization of Storage Space.
- Stable, Resilient and Scalable Design.
- Wide Range of Straight and Beam Sections to Support the Most Demanding Loads.
- Simple to Disassemble, Relocate or Reconfigure.
- Flexible Shelving Pitch.
- Wide Range of Associates Flexible to your needs.

## MEZZANINE FLOORS:

---

Can be installed in virtually any environment and are used in a variety of locations, including warehouses, offices, retail outlets, manufacturing plants, distribution centers and airports. You can use the extra space however you wish, we'll specify the structure's load-bearing capacity to suit your needs.

### *Additional storage:*

Mezzanine floors can give you a vast amount of extra floor space. They can also be useful for storing products away from your main warehouse area.

## MOBILE COMPACTORS

Shelving installed on a mobile base, producing a unique storage facility. These are mobile trolley (chassis) installed mobile compactors shelving systems that move on tracks that provide the highest storage capacity.

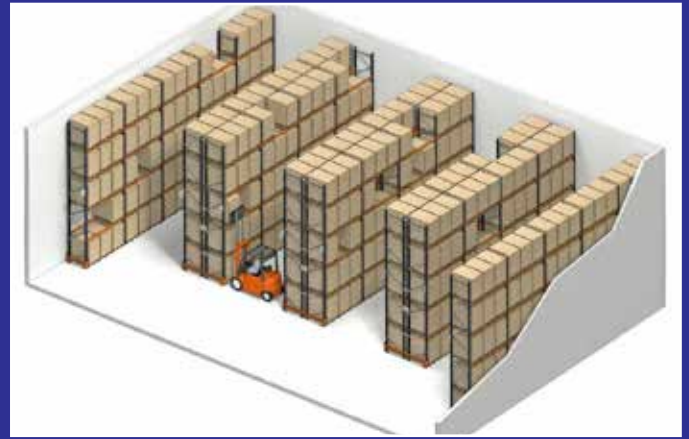

These mobile compactors systems have only one-way passage through increasing efficiency of the storage. Mobile compactors are completely safe to use.

### *Uses for*

- Lightweight Versatile Products Warehouse
- Filing Storage
- Warehouse of valuable Items
- Light Design
- Pharmaceutical production Units
